Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Claims 1-6 and 11 drawn to a display device with a space and or with electron emitters arranged or contained in space or having a space with spacer length.

Species II: Claims 7 and 8 drawn to a display device with methods of coupling sheet-form support members.

Species III: Claim 9 drawn to a display device with through hole in support members.

Species IV: Claim 10 drawn to a display device with one support member of milk white color.

Species V: Claims 12, 29-32 drawn to a display device with aspect ratio H/D of the spacer is in the range of 20:1 to 100:1.

Species VI: Claims 13-16 drawn to a display device with a spacer formed of a main component SiO₂ and strain point of not lower than 400 degrees C.

Species VII: Claims 17-19 drawn to a display device with conductive film for support members having a resistance value range of 10⁵ to 10¹² ohms/ .

Species VIII: Claims 20-28 drawn to a display device wherein a conductive material is dispersed in the glass constituting the spacer with surface resistance of the glass being a resistance value range of 10⁵ to 10¹² ohms/ .

Species IX: Claims 33-35 a display device with spacers arranged on to scanning electrodes and also including signal electrodes with crossing points.

Art Unit: 2879

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 4 is held generic to Species II-VIII and claim 13 is held generic to Species VI-VIII.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2879

A telephone call was made to Alan E Schiavelli on May 18, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn Zimmerman whose telephone number is (571) 272-2466. The examiner can normally be reached on M-W 8-5.
